13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/EIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In reference to Notice of Incidents of Noncompliance #99-DW-132:

The production from this well goes into a 3-phase separator. The gas is metered and then transported to Marathon's Indian Basin Gas Plant via pipeline. After processing, the gas and NGLs are metered and sold at the tailgate of the plant. The liquid hydrocarbon production is measured, using a turbine meter, and then is transported to the storage and measurement facility at the Indian Basin Gas Plant through the liquid gathering system. The water is measured, using a turbine meter, and then flows into a fiberglass storage tank on location. It is then pumped into Marathon's SWD system where it is injected into various salt water disposal wells per prior approvals. The turbine meters used as the alternate method of measurement for the water and liquid hydrocarbon production are proved on a regular basis.
