13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Gas production on the subject lease is being flared due to the exorbitant cost of having a purchaser lay 2 1/2 miles of pipeline to our lease. Currently the lease is producing less than 100 MCFPD of casinghead gas with an H₂S content of 0.145 mole percent. The purchaser is requesting \$90,000.00 from Read & Stevens for laying the 2 1/2 miles of flowline. Based on the current flow rate, purposed terms of purchase, and the capitol expenditure required, the expenditure represents a very long payout with a very poor return on investment to Read & Stevens. Therefore an additional extension of the waiver to the No Flare Rule of 1 year is requested.
