

YATES PETROLEUM CORPORATION

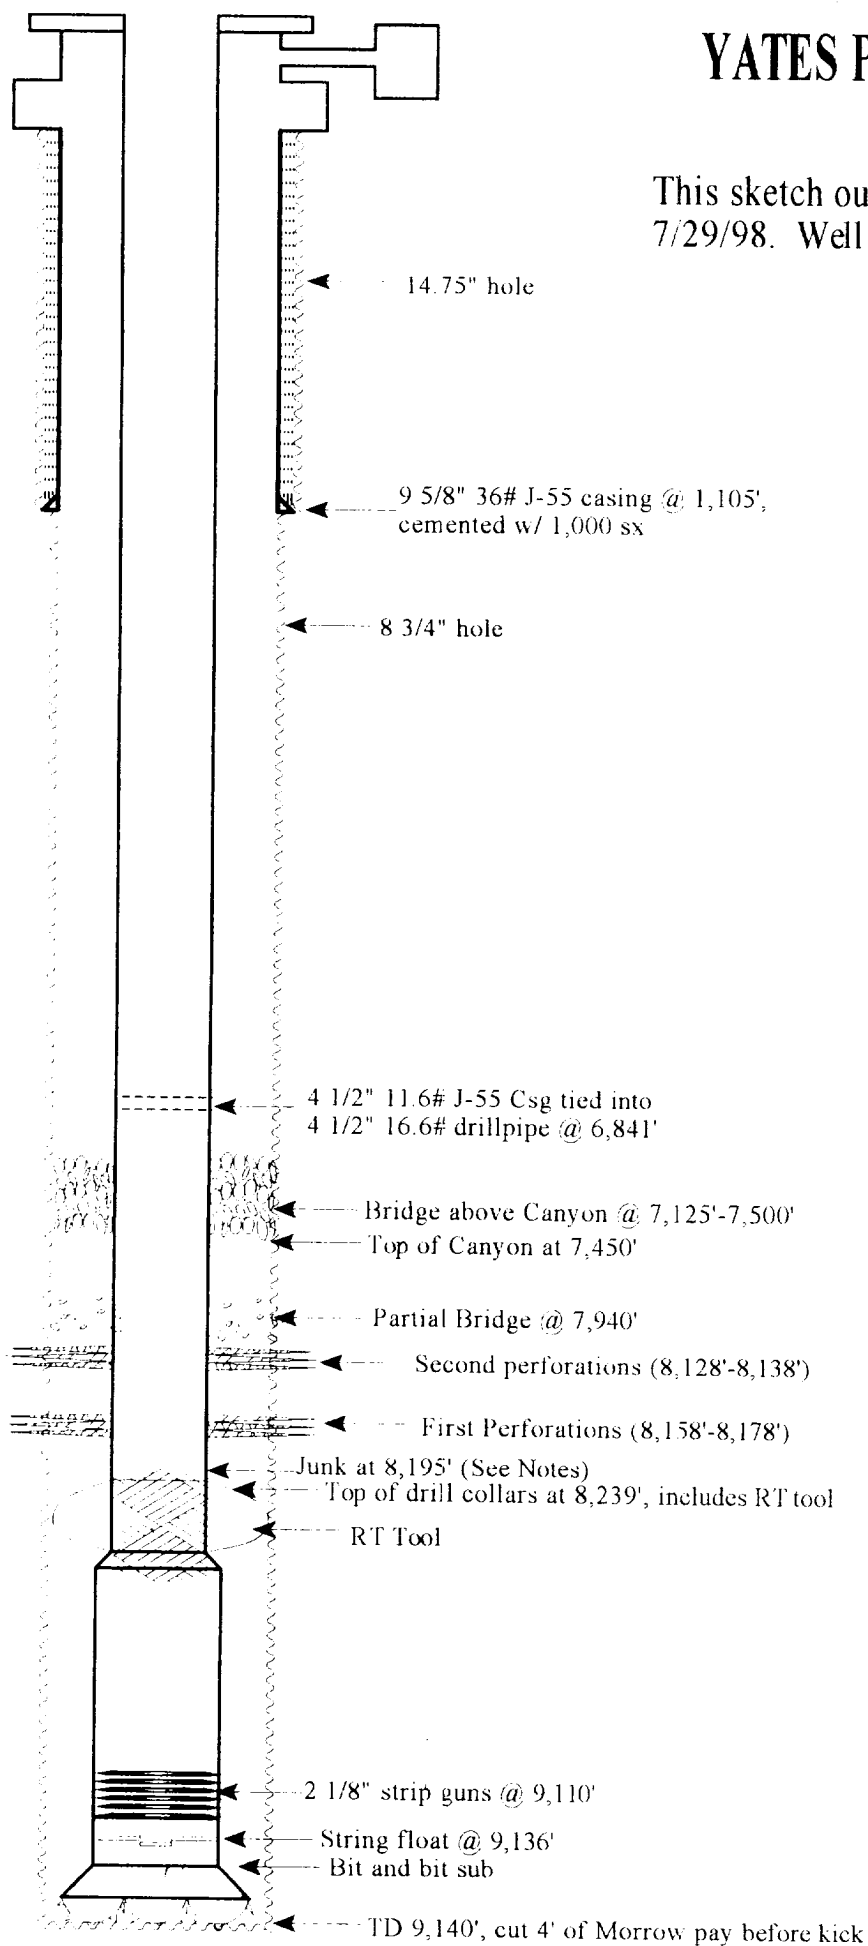

Preston Federal #25

This sketch outlines the conditions of the wellbore as of 7/29/98. Well is now turned over to production.

Notes About This Sketch

The junk at 8,195' consists of pieces of the original strip guns that were going to be used to perforate the collars, pieces of a 2 1/4" bit, motor, and some 1 1/4" coiled tubing on top of the motor.

This is the final sketch, and should illustrate the exact hole conditions as of 7/29/98

Drawing #4

Prepared by Cory F. on 7/29/98
