13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

PALOMA RESOURCES, INC. proposes to re-enter the above described well. This well was originally drilled by C&K Petroleum as the #1 Allied Chemical Federal. This well was drilled to the Morrow Formation and was subsequently plugged back to the Delaware. See the attached information regarding surface use, etc.

This well was P & A'd on October 27, 1977. Currently the 13 3/8" casing is in place and had cement circulated. The 9 5/8" casing is also in place to 5410' with cement circulated. No new hole will be drilled and no new casing run. Operator plans to weld on wellhead, test wellhead, casing and BOP prior to drilling surface plug. BOP's will be tested daily. See Attached Diagram.
