13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 11/24/93, we perforated Upper Brushy Canyon from 7100' - 7028' (19 holes). The perfs were acidized with 1500 gals. 7½% NEFE acid. On 11/29/93, we fraced the perfs with 16,296 gals. gelled 2% KCl water + 26,000 lbs. sand. The well was cleaned up and the new perfs were co-mingled with the existing Lower Brushy Canyon perfs. Currently, we are testing the well.
