13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Propose to set a cement plug in drilled hole from 4250' to the top of a fish @ 4514', sidetrack the fish and drill a new directional hole to a BHL of 406' FNL & 1668' FEL, Sec 20. After setting 13-3/8" csg @ 700' and 8-5/8" csg @ 4070' and drilling a directional hole to a TVD of 8100' @ a BHL of 634' FSL & 1754' FEL, Sec 20, the bottomhole drilling assembly stuck while making a short trip to log on 7-21-94. The drill pipe was backed off above the fish and a fishing assembly was run. The fishing assembly became stuck, and the drill pipe backed off above that. Fishing operations have continued for 8 days with no progress. If current operations are unsuccessful, we propose sidetracking.
