8-30, 1952

Well No. 1 is located 2310 ft. from N line and 2310 ft. from E line of sec. 29

S. E. 1/4 Sec. 29 (1/4 Sec. and Sec. No.) 26 S (Twp.) 27 E (Range) \_\_\_\_\_ (Meridian)  
Wildcat (Field) Eddy (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3190 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We encountered oil at 877 to 833 feet while drilling. Shut down to make production test. Well settled down to six bbls. per day. Pumped six bbls. per day for 10 days. Set and cemented 6 5/8 inch casing with packer at 866 feet, and acidized with 500 gals. Well is now pumping 8 bbls per day.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
