Dallas, Texas

Re: Humble State Well No. 6, Unit D,  
Sec. 16, T-26-S, R-28-E

Dear Mr. Vanderlaan:

The District Supervisor for the No. 2 District of the Oil Conservation Commission has written to you regarding the subject well. It is our understanding that this well has been plugged; however, the dead man wires have not been cut and there is no marker. In addition, there is a hole close to this well which is some 250 feet deep and has 8-5/8" casing in it. We presume that this adjacent hole was drilled by you, and of course, it must be plugged.

Please inform us as to your intentions regarding the plugging of the adjacent hole and the clearing of the subject well location. If we do not hear from you regarding this matter, we will demand that your surety, Fidelity and Deposit Company of Maryland, plug the hole and clear the location.

Very truly yours,

Oliver E. Payne  
General Counsel

OEP:bp

CC-Mr. M. L. Armstrong

OFFICE OF CONSERVATION COMMISSION  
P.O. BOX 541  
SANTA FE, NEW MEXICO

Dear Sir:

Enclosed for you are two copies of a report on the results of the survey of the Santa Fe River and its tributaries, conducted by the Commission during the summer of 1964.

Very truly yours,  
Director

The report contains a description of the river and its tributaries, a list of the plants and animals found in the river, and a list of the plants and animals found in the surrounding area. It also contains a list of the plants and animals found in the river and its tributaries, a list of the plants and animals found in the surrounding area, and a list of the plants and animals found in the river and its tributaries.

I am sure that you will find this report of interest and value. It is a valuable contribution to the knowledge of the Santa Fe River and its tributaries, and it is a valuable contribution to the knowledge of the plants and animals found in the river and its tributaries.

Sincerely,  
Director
