Completion or Re-completion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The subject well was spudded on August 22, 1972 and an 11 inch hole was drilled to 563' which was 75' into the Delaware Formation. 7-5/8" 24#/ft. casing was run to T.D. and cemented with 325 sx. cement with 50 sx. circulated to pit. After W.O.C. 18 hours the casing was tested to 1000 psi and held OK. A 6-1/2" hole was drilled to 1302' at which time coring commenced. The well was cored from 1302' to 1380' and reamed to 6-1/2" hole and T.D. at 1412'. 4-1/2" 9.5#/ft. casing was run to 1412' on October 1, 1972 and cemented with 100 sx. cement. After W.O.C. 24 hours the well was perforated from 1350'-1356' with 12 jet shots. The well was then fractured with 5000 gas. YF60 and 11000# sand. Pump equipment was installed and testing commenced.

18. I hereby certify that the foregoing is true and correct
