Re: Sulphate Sister SWD No. 1
Section 13, T25S, R26E
Eddy County, New Mexico

Gentlemen:

After talking with district representatives who witnessed the step rate test on the above captioned well, you are hereby approved to increase your surface injection pressure to 1500 psi. Due to the relatively shallow depth at which this well is completed, we ask that you please submit a tracer survey taken every six months to establish that there is no leakage of fluids into adjoining formations.

Yours very truly,

Joe D. Ramey
JOE D. RAMEY
