17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Subject well was spudded 11:15 A.M. on February 10, 1975. Drilled to 523' and then set 7" STC 20# casing at 516' on February 12, 1975. Cemented with 150 sacks class "C" cement with good circulation. After W.O.C. 25 hours, then drilled to 1314'. Cored interval from 1314' to 1372'. Drilled from 1372' to 1484'. Cored interval from 1484' to total depth of 1987'. No analysis of the last 150' was run. Reamed cored interval and logged well with Dual Induction-Laterolog, Microlog, Borehole Compensated Sonic Log. On February 27, 1975, 1857.24' of 4½" 10.5# new pipe was run. Eight centralizers were located from T.D. back to 1200'. Plugged back total depth to 1826.32'. Cementing went good and found top of cement at 640' from the surface. Prepare to perforate.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
