13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

McKay Oil proposes to consturct a natural gas flow line from the Cactus "B" Fed. #4 to the Cactus Fed. #4 well. The flow line will be constructed on the surface due to an abundance of rock outcroppings along the route. The line will be approximately 1,064' in length and will run adjacent to the access road from the 2 locations. See attached map for route taken. The flow line will be constructed using 2-3/8" line pipe.
