CONFIGURATION A

	OPTIONAL	
16 Flanged valve		1-13/16*

CONTRACTOR'S OPTION TO FURNISH:

- All equipment and connections above bradenhead or ceeinghead. Working pressure of preventers to be 3,000 pei, minimum.
- 2. Automatic accumulator (80 gallen, minimum) capable of closing BOP in 20 seconds or less and, holding them closed against full rated working pressure.
- 2.8OP controls, to be located near drillers position.
- 4. Kelly equipped with Kelly cock.
- 5.Inside blowout prevventer er ite equivalent en derrick floor at all times with proper threads to fit pipe being used.
- 8. Kelly saver-sub equipped with rubber casing protector at all times.
- 7. Plug type blowout preventer tester.
- 8.Extra set pipe rame to fit drill pipe in use on location at all times.
- 9. Type RX ring gaskets in place of Type R.

MEC TO FURNISH:

- Bradenhead or casinghead and side valves.
- 2. Weer bushing, Il required.

GENERAL NOTES:

- Deviations from this drawing may be made only with the express permission of MEC's Dritting Manager.
- 2. All connections, valves, littings, piping, etc., subject to wall or pump pressure must be flanged (suitable clemp connections acceptable) and have minimum working pressure equal to rated working pressure of proventers up through cho"e. Valves must be full opening and suitable for high pressure mud service.
- 3.Controls to be of standard deeign and each marked, shawing apening and closing position.
- 4. Choice will be positioned so as not to hamper or delay changing of choice beens. Replaceable parts for adjustable choice, other been sizes, retainers, and choice wrenches to be conveniently located for immediate use.
- S.All valves to be equipped with handwheels or handles ready for immediate
- 6. Choke lines must be suitably anchored.

- 7. Handwheels and extensions to be connected and ready for use.
- 8. Valves adjacent to drilling speci to be kept open. Use outside valves except for emergency.
- All seemises steel central piping (3000 pei working pressure) to have flexible joints to avoid stress. Hosse will be resulted.
- 18. Gesingheed connections shall not be used except in case of emergency.
- 11.Do not use kill line for routine fill-up operations.
