13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Bass Enterprises Production Company respectfully requests approval to construct and maintain a salt water transfer line that will service the Poker Lake Unit #91 well. The proposed route is a Sid Richardson Gas Company pipeline ROW. The Poker Lake Unit #91 is a Federal well that is commingled into the Poker Lake Unit #79 battery which is located on State land. The line will begin at the Poker Lake Unit #79 battery and travel East in Section 1 and turn North into Section 36 and into Section 25 where it will enter the Poker Lake Unit #78 battery. This will be the final destination of the line. Poker Lake Unit #78 battery is located in the NE 1/4 of the NE 1/4 of Section 25, T-25-S, R-30-E. The line will be constructed of 3" SDR-11 polyethylene pipe that is rated to 160 psi. A map is attached showing the proposed route for the line. Total length is approximately 3.7 miles. Installation of this line will reduce costs of disposal by eliminating trucking charges and also reduce traffic on local county roads. Construction should be complete in 2 days. The estimated starting date is June 1, 1998.
