13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy, Inc. requests approval per NMOCD Rule 19.15.12.11 C(2) to downhole commingle production from the Basin Fruitland Coal (71629) and the Fulcher Kutz Pictured Cliffs (77200) pools. XTO proposes to downhole commingle these pools upon completion. Please see the attached spreadsheets for justification of the following proposed allocations:

Fulcher Kutz PC	Oil: 100%	Gas: 76%	Water: 3%
Basin Fruitland Coal	Oil: 0%	Gas: 24%	Water: 97%

Pools are in the NMOCD pre-approved pool combinations for downhole commingle in the San Juan Basin. Ownership is common therefore, there are no owners to notify of our intent to DHC. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights. The NMOCD was notified of our intent via Form C-103 on 12/22/2011.

Allocations are based off the well's current Fruitland Coal production and Pictured Cliffs production in the 9-section area where a 1950's-era well had minimal production and a later Pictured Cliffs producer redeveloped the area.
