Good afternoon Ryan,

Per our conversation this afternoon, full horizontal and vertical delineation must be demonstrated prior to requesting an variance and/or deferment to leave impacted soil in place. Once full delineation is achieved, Ameradev Operating may submit a written request for an variance or/or deferment. As well, please ensure to utilize method 8021 not Texas 1005.

Please let me know if you should have any further questions.

Thank you,

Vanessa Fields

Good Afternoon Christina,

I was hoping to have a quick phone call with you regarding the analytical results from our delineation below. Unfortunately, we ran into tool refusal between 12 ft and 14 ft at the three locations within the spill area and we're not able to safely sample any deeper.

Thank you,

Mr. Millunzi,

NMOCD approves the proposed sample locations for 1RP-**5200**.

Thanks,

Good Afternoon Christina,

I would just like to follow up with our phone conversation yesterday morning in order to get your approval for the attached diagram of our proposed sample locations. Please confirm OCD's approval of these locations. Upon your approval, we will schedule to get on location and complete delineation.

Thank you,

Good Afternoon Christina,

Would you happen to be available for a quick phone call regarding the following incident?

|||| 5200 9/24/2018 A Ameradev Azalea Central tank battery 30-025-44104 26S-36E-28D

We are attempting to complete the full delineation and would like your input on the locations of soil borings. Please see the attached PDF file for our proposed locations.
