Cory:

This email is to notify you that the weeds have been cleaned. Attached you will find before and after photos.

Thanks,
Marcella Marquez

Marcella,

Thanks for the update please keep me updated once it has been completed.

If you could provide pictures of the work so I can document it would be greatly appreciated.

Cory:

A inspection of the Crowe Blanco Properties was made on Friday, August 6, 2021. There were 2

areas on the NE side of the facility where tumbleweeds have accumulated.

We had scheduled to disposed of the tumbleweeds today, but due to the recent rainfall last night we will need to postpone until the area is dry enough for us to be able to get equipment into the area. The forecast is calling for additional precipitation this week. We will schedule the weed clean-up as soon as the weather allows and the area is dry enough to get to.

Thanks,
Marcella Marquez

Subject: NM1-50 Crowe Blanco Land Farm

Marcella,

As discussed today OCD received a Land owner complaint regarding weeds blowing into neighbors yards and they expressed concern regarding fire of said weeds.

As you described on the phone for the most part the facility consist of undeveloped land and is mainly only fenced in and is not currently nor has it ever been in operation with the approved NM1 permit. Could you please have some inspect the facility and remove any weeds from facility fence lines and/or areas were there is an above normal fire hazard as soon as possible. Please let me know when the inspection has been scheduled and the anticipated completion date no later than August 20, 2021

Thanks you,
