13. Describe Proposed or Completed Operations

The subject well has been a large water producer from the MV formation. The well is currently scaled up and has had pumping unit problems since the beginning of the year. Prior to January, the well was making approximately 20 bwpd & 175 mcf. Due to the large water volumes, we would like to ask for an extension of at least 1 year on drilling out the plug over the Dakota zone in order to give additional time to hopefully pump off the Mesaverde. This is a technique that we have had success with in other wells in this area.
