13. Describe Proposed or Completed Operations (Clearly state all pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Bayless proposes setting a booster compressor at a central point to compress gas from all six wells on the Floyd lease. Modeling shows that this will be more effective than replacing all six wellhead compressors with larger units. The compressor would be set adjacent to the right-of-way for El Paso's 4" line, but will be operated by Bayless. An archaeological survey is attached. No new road is required. All construction will be on lease.

14. I hereby certify that the foregoing is true and correct
