Describe Proposed or Completed C	Operation (clearly state all pertinent deta	ails including estimated str	arting date of any pro	posed work and	d approximate duration	on thereof.

If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths or pertinent markers and sands. Attach the Bond under which the work will performed or provide the Bond No. on file with the BLM/ BIA. Required susequinet reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in anew interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notice shall be filed only after all requirements, including reclamantion, have been completed, and the operator has determined that the site is ready for final inspection.)

Devon Energy requests permission to alter the proposed casing program on the subject well. The approved APD called for 9-5/8" surface casing and 4-1/2" production casing. We would like to run 9-5/8" surface, 7" intermediate, and 4-1/2" production casings in the well due to the lost circulation zone in the Fruitland. The Surface will be run to 300' +/- and the 7" will be run to the top of the Fruitland Coal. The 4-1/2" will then be run to TD of the well. Cement will be changed also to add the 7" casing to hole. We will pump 50/50 Poz with nitrogen to foam for the 7" string, and the 4-1/2" string. The 7" slurry will be designed to circulate to surface and the 4-1/2" cement will be designed to tie into the 7" casing at a minimum.

Verbal approval has been received from the BLM per phone conversation with Steve Mason on 5/28/2004.

14. I hereby certify that the foregoing is true and correct. Name (Printed/ Typed)	ткие
