13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Request to set a test compressor on this well. This work involves pulling a compressor mounted on a trailer onto location, and about 3 to 4 hours to hook up compressor. There is currently a compressor on site, which will be shut down to run this test unit. It is understood that if the workers see any unusual aggressive behavior from the golden eagles they will discontinue work. This location is in a high traffic area, however it is classified as a raptor nest site. Thanks.

14. I hereby certify that the foregoing is true and correct.
