13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

When the bradenhead test was conducted 11/26/02 the intermediate casing indicated communication. Plans are to locate the leak and remediate with cement. A brief discription of the work proposed to repair the leak is as follows:

MIRU. Pull tubing, set CIBP & test 5-1/2" casing. If it doesn't test, plans are to isolate leak and squeeze with cement. If the 5-1/2" casing does test, we will squeeze cement at the 7-5/8" casing shoe and then pressure test. RIH w/2-3/8" tubing and return to production. Plans are to conduct the work the first half of January 2003.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #16633 verified by the BLM Well Information System
For PHILLIPS PETROLEUM COMPANY, sent to the Farmington
