13. Describe proposed or completed operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 19 15 7 14 NMAC. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Sundry filed for informational purposes only. The above mentioned well has not produced since March 2010.
In addition to the below described surface work BP plans to replace the well head.

The following reasons for not producing and associated timing also applies to Jaquez GC C 1 30-045-08647.

1. Lines from this location to Enterprise were removed for El Paso remediation work that concluded in March/April 2011. We are currently trying to re-lay those lines (tentatively scheduled for 6/13/11).
2. The pipeline is going to include a support structure to span over the irrigation ditch. BP does not know exact timing on this & is working with an engineering contractor.
3. The vehicle traffic bridge for this location is not adequate to support large vehicle traffic therefore BP cannot allow water haulers to cross this bridge until repair is complete. A plan is currently going through BP channels to work procurement for the repairs that must take place on the bridge. Again we do not know exact timing but plan is to have the bridge repaired by end of Aug. 2011.

Spud Date: **12/12/1972**

Rig Release Date:
