SEE RULE 19.15.7.14 NMAC For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

BP America Production Company requested permission to complete into the Basin Mancos & downhole commingle production with the existing Basin Dakota. Approval was granted 4/14/11 DHC 3564AZ. This AMENDED application to DHC is to correct the pool name to PINON GALLUP.

The DK (71599) & the Pinon Gallup (50380) pools are pre-approved for DHC per NMOCD Case No. 12520; Order No. R-11567 effective 04/26/2001. Although the interest owners are not identical between these two pools, this same order established approval for subsequent applications for DHC of production in wellbores within the GCU without notice to the unit interest owners. Therefore, no additional notification is required prior to DHC approval.

Production is proposed to be allocated based on the subtraction method using the DK projected future decline. That production will serve as a base for production subtracted from the total production for the commingled well. The balance of the production will be attributed to the Pinon Gallup.

Commingling production downhole in the subject well from the proposed pools will not reduce the value of the total remaining production. BLM will be notified of amended pool on subsequent report via form 3160-5 for lease NMSF 078106

Please see attached amended C-102. ** New DHC order voids DHC 3564AZ due to a change in pool name - new DHC is:*
