13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

DJR Operating LLC is requesting approval to shut-in the subject well pursuant to IM No. NM-2016-017 due to economics resulting from the low price of oil. No equipment will be removed which could affect the capability of the well to produce. The estimated date when the well will be returned to production is dependent on oil prices; therefore, a specific time frame when the well will be returned to production is unknown.

Pursuant to a telecon with Dave Mankiewicz and Joe Killins on May 6, 2020, DJR will schedule a meeting with the BLM on or before February of 2021 to discuss specifics associated with conducting the production verification test required in IM-2016-017 if the well will be shut-in for 12 consecutive months.
