	NORT	HWEST NEWMEXICO	PACKER LEAKAGE	TEST INSTRUCTIO	NS
 A packer leakage test shall be comm completion of the well, and annually there Such tests shall also be commenced on all chemical or fracture treatment, and whene the tubing have been disturbed. Tests sha requested by the Division. At least 72 hours prior to the comme Division in writing of the exact time the to 3. The packer leakage test shall comme stabilization. Both zones shall remain shu however, that they need not remain shut-i 	after as prescribed by the order author multiple completions within seven day ver remedial work has been done on a ll also be taken at any time that commu- encement of any packer leakage test, the st is to be commenced. Offset operator nce when both zones of the dual comp t-in until the well-head pressure in eacl	izing the multiple completion s following recompletion and well during which the packet inication is suspected or when e operator shall notify the ors shall also be so notified.	. for Flow Tes d/or remain shut- r or 7. Pressur intervals as f intervals dur immediately flow period, to the conch which have p 24-hour e with recordin once at the e completion,	st No. 2 is to be the same a in while the zone which we res for gas-zone tests must follows: 3 hours tests: imm ing the first hour thereof, a prior to the conclusion of at least one time during ea sion of each flow period. previously shown questionar r oil zone tests: all pressur ng pressure gauges the accound of each test, with a dea	ed even though no leak was indicated during Flow Test No. 1. Procedure as for Flow Test No. 1 except that the previously produced zone shall as previously shut-in is produced. be measured on each zone with a deadweight pressure gauge at time tediately prior to the beginning of each flow period, at fifteen-minute and at hourly intervals thereafter, including one pressure measurement each flow period. 7-day tests: immediately prior to the beginning of each flow period (at approximately the midway point) and immediately prior Other pressures may be taken as desired, or may be requested on wells able test data. es, throughout the entire test, shall be continuously measured and recorded curacy of which must be checked at least twice, once at the beginning and dweight pressure gauge. If a well is a gas-oil or an oil-gas dual be required on the oil zone only, with deadweight pressures as required
4. For Flow Test No. 1, one zone of th while the other zone remains shut-in. Suc 24 hours in the case of an oil well. Note: atmosphere due to lack of a pipeline conn	h test shall be continued for seven days if, on an initial packer leakage test, a g	s in the case of a gas well and as well is being flowed to the	n l for 9 8. The res test. Tests s Northwest N	sults of the above-described hall be filed with the Aztec lew Mexico Packer Leaka	d tests shall be filed in triplicate within 15 days after completion of the 2 District Office of the New Mexico Oil Conservation Division on ge Test Form Revised 10-01-78 with all deadweight pressures indicated tures (gas zones only) and gravity and GOR (oil zones only).
 Following completion of Flow Test 1 above. 	No. 1, the well shall again be shut-in, ir	accordance with Paragraph	3
