

CONDITION(S) OF APPROVAL – C-144

Vanderwart 002E

API# 3004525179

Remove the existing tank and replace with installed tank that complies with the rule and as specified in the usual BP design portion of the C-144 submittal signed by Andrew Hawk for Jeffery Peace. Note: The usual section detailing construction (generally section 11) in the Below-Grade Tank Design and Construction Plan is not found in the package. It is assumed herein that it should have been included. If this is not the case, please inform the O.C.D., otherwise we can utilize others similarly indicated for this approval and condition.

Brad Billings
