	NORT	HWEST NEWMEXICO	PACKER LEAKAGE	E TEST INSTRUCTIO	NS			
1. A packer leakage test shall be comm completion of the well, and annually there						k was indicated during Flow Test No. 1. Procedure except that the previously produced zone shall		
Such tests shall also be commenced on al chemical or fracture treatment, and when	l multiple completions within seven day	s following recompletion an	d/or remain shut-	remain shut-in while the zone which was previously shut-in is produced.				
the tubing have been disturbed. Tests sha requested by the Division.	all also be taken at any time that comm	unication is suspected or whe	Pressur			zone with a deadweight pressure gauge at time		
 At least 72 hours prior to the comm 	encement of any packer leakage test, th	a operator shall potify the	intervals dur	ring the first hour thereof,	and at hourly intervals	eginning of each flow period, at fifteen-minute thereafter, including one pressure measurement lay tests: immediately prior to the beginning of each		
Division in writing of the exact time the t			flow period, to the conch	at least one time during e usion of each flow period.	ach flow period (at app Other pressures may	proximately the midway point) and immediately prior be taken as desired, or may be requested on wells		
			24-hou		es, throughout the ent	ire test, shall be continuously measured and recorded		
3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.				end of each test, with a de	adweight pressure gau	be checked at least twice, once at the beginning and ge. If a well is a gas-oil or an oil-gas dual zone only, with deadweight pressures as required		
nowever, that they need not remail shut-	in more than seven days.			taken on the gas zone.				
4. For Flow Test No. 1, one zone of the while the other zone remains shut-in. Sur	ch test shall be continued for seven day	s in the case of a gas well and	l for	sulte of the above descent	d teete ehall he filed in	triplicate within 15 down open action of the		
24 hours in the case of an oil well. Note: atmosphere due to lack of a pipeline conr			test. Tests s	8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Form Revised 10-01-78 with all deadweight pressures indicated				
			thereon as w			and gravity and GOR (oil zones only).		
Following completion of Flow Test above.	No. 1, the well shall again be shut-in, in	n accordance with Paragraph	3
