**13. Describe Proposed or Completed Operations**

It is intended to remove the packer on the dual well and commingle the production from the Blanco Mesaverde (pool 72319) and the South Blanco Pictured Cliffs (pool 72439). The production will be commingled according to Oil Conservation Division Order Number 11363. Allocation and methodology will be provided after the well is completed. Commingling will not reduce the value of the production. The Bureau of Land Management has been notified in writing of this application.

Proposed perforations are: PC - 3060' - 3116' ; MV - 4688' - 5354' These perforations are in TVD.

As referenced in Order #R-10696 interest owners were not re-notified.

BR will use some form of the subtraction method to establish an allocation for commingled wells.

DHC 3667 AZ
