Xes □ No □ Not Required		
By Whom? ES+H Reporting Contractor	Date and Hour 1.7.2011 @ 18:30 hours	
Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse.	
☐ Yes ☒ No		
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken:		
Williams operator arrived to meter run location and heard blowing natural gas. After inspection, the Williams operator discovered that the top of the check		
valve was missing.		
Describe Area Affected and Cleanup Action Taken:		
Operator blocked in the meter run and replaced the check valve. Natural gas loss was to atmosphere; no impact to soils, water/groundwater. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and		
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger		
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability		
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health		
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.		
regular, state, of focal laws and of regulations.	OIL CONSERVATION DIVISION
