13 Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Encana Oil & Gas (USA) Inc. (Encana) submitted an Application for Permit to Drill the Lybrook H04-2208 01H oil well on November 28, 2011.

Encana would like to adjust the spacing unit dedicated to this well from 965.8 acres to 240 acres.

This change is requested due to the 02/15/12 implementation of revised State of New Mexico oil and gas regulations that define a project area as an area that comprises one or more complete contiguous spacing units that are developed by the well (19.15.16.6 NMAC).
