Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary)

A hole in the bottom of the tank allowed the condensate to drain out of the storage tank into the area inside the tank berm. The free liquids were vacuumed up and put into a new storage tank.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

All fluids were contained inside the tank berms. The storage tank will be moved and the impacted soils will be excavated and landfarmed onsite.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
