13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Land farm on location has been remediated and has passed all required soil testing and remediation is complete. The testing and remediation was carried out by DPC and Blagg Engineering Inc. The analytical data and information was generated using specified and selected methods for determination of organic compounds EPA-600/4-79-020, and test methods for evaluating solid wastes, sw846. All samples were received by Envirotech Analytical Laboratories in good condition on 7/20/09. This sundry serves notice that Dugan Production intends to close this land farm and use the remediated soils as needed on the lease. Land farm (4 cu yards) was initiated 2/20/2006. See attachments.
