13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well was originally permitted as a Gallup completion only. Merrion Oil & Gas proposes to drill the subject well through the Dakota formation. A downhole commingling application will be filed with the NMOC.

We propose to drill to a TD of 6110' and set the liner casing at that depth.

We also propose to move the location of the well as requested by NAPI. Representatives from NAPI approved the location during the original on site inspection, but they subsequently discovered that one of their water lines would be closer to the wellbore than NAPI allows in their specifications. The proposed location is 1525' fnl & 930' fwl of the same section, township and range as the originally proposed location. A survey plat is attached. Revised arch clearance, T&E and EA documents have been forwarded to you from Permits West.

Please provide your revised drilling program.
