XTO Energy Inc. requestsd and received permission to downhole commingle production from the Otero Chacra (82329) and Blanco Mesaverde (72319) pools in the Boack C #23 (DHC-1742AZ). XTO is currently drilling this well and will downhole commingle these pools upon completion of the well. Supporting documentation on original application had correct allocations, but Form C103 had allocations for Oil reversed per zones. In correcting the oil allocations, we reversed our gas allocations. Below are our corrected allocations based on production analysis of wells located in a nine section surrounding area:

**\*\*SECOND CORRECTED ALLOCATIONS\*\***

Otero Chacra	Oil 0%	Gas 35%
Blanco Mesaverde	Oil 100%	Gas 65%

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOC guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan.
