13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

While drilling the intermediate hole on the subject well we found the well had deviated greater than 5 degrees and now we need to directional steer this hole back to standard. **Burlington received verbal approval from Charlie Perrin (OCD) to use directional tools to steer this well back to vertical.** Directional surveys will be conducted to intermediate setting depth and then once intermediate casing is set and cemented in place we will drilled to TD as originally planned with air and will survey the well at intermediate and total depth and submit all deviation information with the completion reports.

Also we noticed that the geological tops for the Ojo Alamo and the Kirtland interval were incorrect on the drilling prognosis. The revised Tops are: Ojo Alamo – 1128' and the Kirtland is 2432'.
