13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

While attempting to perform a mechanical integrity test, it was discovered that this well had been perforated from 438' - 453' and from 456' to 461' GL with a bridge plug set at approximately 518'. Coulthurst Management requests permission to drill out any bridge plugs in the well and set the packer at approximately 400' GL. The maximum injection pressure will be 87 psi. It was also discovered that there was no bradenhead on this well. Coulthurst proposes to weld a plate from the surface casing to the production casing and installing a bradenhead valve.
