13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

HPOC will be re-completing the 8Federal#2M as well as the Eagle Springs 8Federal#1H soon. HPOC will be operating these wells at higher volumes (4,000 to 5,000 bfpd). HPOC will be injecting production water into the Eagle Springs 9Federal#1 SWD well. To accommodate the increased fluid volumes, HPOC will be adding a new 12'x25' gunbarrel separator, and be constructing a 30'x40' metal building to house its injection equipment (charge pump, filtration skid, horizontal pump, and controls). All of these additional items will be constructed adjacent to the existing tank battery on HPOC's Eagle Springs 8Federal pad.
