If a Watercourse was Impacted, Describe Fully.*

Pipeline leak was discovered in the middle of a natural drainage. The spill was contained to a 5' diameter with a depth of approximately 2". The site was bermed to prevent traveling. No surface water was impacted.

Describe Cause of Problem and Remedial Action Taken.*

The SJ C4 gas pipeline developed a leak which released produced water and condensate at a point where the line crosses a small wash. The wells on the pipeline were immediately shut-in and the spill site bermed.

Describe Area Affected and Cleanup Action Taken.*

ConocoPhillips will assess the soil to determine a path forward for clean-up if necessary.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
