Type of Release: natural gas	Volume of Release: 66 Mcf	Volume Recovered: None
Source of Release: water dump valve from separator to BGT	Date and Hour of Occurrence: 5/20/13 - 1:00 AM to 1:00 PM	Date and Hour of Discovery: 5/20/2013 1:00 PM
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour:	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

RCVD MAY 23 '13

OIL CONS. DIV.
DIST. 3

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Field tech arrived on location and noticed gas was blowing through the water dump line to the BGT. The dump valve was stuck in the open position. The field tech tripped the dump valve and it closed, stopping the release.

Describe Area Affected and Cleanup Action Taken.*

The released gas dissipated into the atmosphere. No cleanup action was possible.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
