Latitude 36.18780 Longitude 107.48297

**NATURE OF RELEASE**

Type of Release Crude Oil	Volume of Release ~ 25 bbls	Volume Recovered Estimated 20 bbl total including contaminated soil
Source of Release Suction scrubber from VRU pressure relief	Date and Hour of Occurrence Estimated 9/8/13 at 5:00pm	Date and Hour of Discovery Estimated 9/8/13 at 5:00pm
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Brandon Powell	
By Whom? Briana Gerou	Date and Hour 9/9/13 3pm	ROUND SEP 23 '13
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse: N/A OIL CONS. DIV. DIST. 3	

If a Watercourse was Impacted, Describe Fully.\*  
N/A

Describe Cause of Problem and Remedial Action Taken.\*  
Tank valves were inadvertently left closed after unloading. Pressure built up and released from the VRU suction scrubber.

Describe Area Affected and Cleanup Action Taken.\*  
The release that occurred on the Lybrook A 32 well site impacted the area north of the well head and surface production equipment. The bulk of the release was confined to the tank battery area within impermeable containment. A storm water collection pond, located at the north east corner of the location was impacted by isolated areas of oil sheen.  
Upon discovery of release, Envirotech was dispatched to the location. Hydro excavation vacuum trucks were utilized to remove free standing oil, impacted gravel and soil, as well as the areas of impacted water in the pond. Oil absorbing booms and pads were placed in the pond to absorb any additional oil. Perimeter fencing was employed to deter wildlife entry until all oil was absorbed. Upon a one call being valid, the impacted soil was excavated and disposed of at Envirotech's Landfarm #2.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
