	NORTH	IWEST NÉWMEXICO	PACKER LEAKAGE	E TEST INSTRUCTIO	NS		
<ol> <li>A packer leakage test shall be comm completion of the well, and annually there</li> </ol>						ak was indicated during Flow Test No. 1. Procedure 1 except that the previously produced zone shall	
Such tests shall also be commenced on all chemical or fracture treatment, and when	multiple completions within seven days	following recompletion an	d/or remain shut-	in while the zone which v			
the tubing have been disturbed. Tests sha requested by the Division.			en	res for gas-zone tests mus	be measured on eac	h zone with a deadweight pressure gauge at time	
			intervals dur	ing the first hour thereof,	and at hourly interva	beginning of each flow period, at fifteen-minute Is thereafter, including one pressure measurement	
<ol> <li>At least 72 hours prior to the common Division in writing of the exact time the to</li> </ol>			flow period,	at least one time during e	ach flow period (at a	-day tests: immediately prior to the beginning of each pproximately the midway point) and immediately prior y be taken as desired, or may be requested on wells	
			which have	previously shown question	able test data.	ntire test, shall be continuously measured and recorded	
<ol> <li>The packer leakage test shall commendate stabilization. Both zones shall remain shu</li> </ol>			e with recordi once at the e	ng pressure gauges the ac end of each test, with a de	curacy of which mus adweight pressure ga	t be checked at least twice, once at the beginning and uge. If a well is a gas-oil or an oil-gas dual	
however, that they need not remain shut-i				the recording gauge shall taken on the gas zone.	be required on the o	l zone only, with deadweight pressures as required	
4. For Flow Test No. 1, one zone of th							
while the other zone remains shut-in. Suc 24 hours in the case of an oil well. Note:	if, on an initial packer leakage test, a ga	is well is being flowed to the	e 8. The rea			in triplicate within 15 days after completion of the	
atmosphere due to lack of a pipeline conn	ection the flow period shall be three ho	urs.	Northwest M	New Mexico Packer Leak	ge Test Form Revise	the New Mexico Oil Conservation Division on the dot of the deadweight pressures indicated the dot of the deadweight of	
			increon ds v	on as the nowing temper	and the route out	, and Bravity and GOR (on Zones Only).	

5. Following completion of Flow Test No. 1, the well shall again be shut-in, in accordance with Paragraph 3 above.
