	NOR1	HWEST NEWMEXICO	PACKER LEAKAGE	TEST INSTRUCTIONS				
1 A packet lask and that shall be contine	14	Il within seven days after actu	al 6 Flow 1	est No. 2 shall be conducted a	ven though no leak was indicated during Flow Test No. 1. Procedure			
<ol> <li>A packer leakage test shall be continued on each multiply completed well within seven days after actual completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion. Such tests shall also be commenced on all multiple completions within seven days following recompletion and/or</li> </ol>				for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the zone which was previously shut-in is produced.				
chemical or fracture treatment, and whene the tubing have been disturbed. Tests shal requested by the Division.			n 7. Pressu		measured on each zone with a deadweight pressure gauge at time			
2. At least 72 hours prior to the comme	ncement of any nacker leakage test t	he operator shall notify the	intervals du	ing the first hour thereof, and a	ttely prior to the beginning of each flow period, at fifteen-minute at hourly intervals thereafter, including one pressure measurement h flow period. 7-day tests: immediately prior to the beginning of each			
Division in writing of the exact time the ter			to the concl		flow period (at approximately the midway point) and immediately prior her pressures may be taken as desired, or may be requested on wells test data			
3. The packer leakage test shall commer			24-hou e with recordi	r oil zone tests: all pressures, t ng pressure gauges the accurac	hroughout the entire test, shall be continuously measured and recorded cy of which must be checked at least twice, once at the beginning and			
stabilization. Both zones shall remain shut however, that they need not remain shut-ir		h has stabilized, provided	completion,		ight pressure gauge. If a well is a gas-oil or an oil-gas dual equired on the oil zone only, with deadweight pressures as required			
4. For Flow Test No. 1, one zone of the while the other zone remains shut-in. Such								
24 hours in the case of an oil well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to lack of a pipeline connection the flow period shall be three hours.				8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Form Revised 10-01-78 with all deadweight pressures indicated				
<ol> <li>Following completion of Flow Test N</li> </ol>	Io 1 the well shall again he shut in i	n accordance with Paragraph	thereon as v		s (gas zones only) and gravity and GOR (oil zones only).
