	NORT	THWEST NEWMEXICO	PACKER LEAKAGE	TEST INSTRUCTION	ONS			
<ol> <li>A packer leakage test shall be commenced on each multiply completed well within seven days after actual completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion.</li> </ol>				6. Flow Test No. 2 shall be conducted even though no leak was indicated during Flow Test No. 1. Procedure for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall				
Such tests shall also be commenced on all i chemical or fracture treatment, and whenev	nultiple completions within seven da	sys following recompletion an	d/or remain shut-	remain shut-in while the zone which was previously shut-in is produced.				
the tubing have been disturbed. Tests shall requested by the Division.	also be taken at any time that comm	nunication is suspected or whe	7. Pressur			zone with a deadweight pressure gauge at time		
		h	intervals dur	ing the first hour thereof	, and at hourly interval	beginning of each flow period, at fifteen-minute s thereafter, including one pressure measurement day tests: immediately prior to the beginning of each		
<ol> <li>At least 72 hours prior to the commen Division in writing of the exact time the test</li> </ol>			flow period,	at least one time during	each flow period (at ap	proximately the midway point) and immediately prior be taken as desired, or may be requested on wells		
к <b>т</b> т. т.	• • •		24-hou		ires, throughout the en	tire test, shall be continuously measured and recorded		
3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.			once at the	with recording pressure gauges the accuracy of which must be checked at least twice, once at the beginning and once at the end of each test, with a deadweight pressure gauge. If a well is a gas-oil or an oil-gas dual completion, the recording gauge shall be required on the oil zone only, with deadweight pressures as required				
nowever, that they need not remain shut-in	more man seven days.			taken on the gas zone.		Sing, with coordination proportion to required		
4. For Flow Test No. 1, one zone of the while the other zone remains shut-in. Such	test shall be continued for seven da	ys in the case of a gas well and	d for					
24 hours in the case of an oil well. Note: i atmosphere due to lack of a pipeline conne	gas well is being flowed to the	e 8. The rest test. Tests	hall be filed with the Azt	ec District Office of th	n triplicate within 15 days after completion of the e New Mexico Oil Conservation Division on d 10.01.78 with all deadwaight pressures indicated			
						d 10-01-78 with all deadweight pressures indicated and gravity and GOR (oil zones only).		
5. Following completion of Flow Test N above.	lo. 1, the well shall again be shut-in,	in accordance with Paragraph	3
