	NOR	THWEST NEWMEXICO I	PACKER LEAKAGE	E TEST INSTRUCTIO	ONS	· · ·		
1. A packer leakage test shall be con	menced on each multiply completed we	ll within seven days after actual	6. Flow T	fest No. 2 shall be conduc	ted even though no le	ak was indicated during Flow Test No. 1. Procedure		
Such tests shall also be commenced on	ereafter as prescribed by the order author all multiple completions within seven da enever remedial work has been done on	ys following recompletion and	or remain shut-	st No. 2 is to be the same in while the zone which w		I except that the previously produced zone shall is produced.		
	shall also be taken at any time that comn			res for gas-zone tests mus	t be measured on eac	h zone with a deadweight pressure gauge at time		
			intervals du	ring the first hour thereof,	and at hourly interva	beginning of each flow period, at fifteen-minute Is thereafter, including one pressure measurement		
	mencement of any packer leakage test, t e test is to be commenced. Offset opera		flow period,	at least one time during	each flow period (at a	-day tests: immediately prior to the beginning of each pproximately the midway point) and immediately prior / be taken as desired, or may be requested on wells		
······································	/		which have 24-hou	previously shown questio ir oil zone tests: all pressu	nable test data. ires, throughout the e	ntire test, shall be continuously measured and recorded		
	mence when both zones of the dual com thut-in until the well-head pressure in ea thin more than seven days		once at the	end of each test, with a de	adweight pressure ga	be checked at least twice, once at the beginning and uge. If a well is a gas-oil or an oil-gas dual I zone only, with deadweight pressures as required		
as sever, that they need not remail \$00	a in more than seven days,			taken on the gas zone.		2		
while the other zone remains shut-in. S	the dual completion shall be produced a such test shall be continued for seven da	ys in the case of a gas well and	for	sults of the above-describ	ed tests shall be filed i	n triplicate within 15 days after completion of the		
24 hours in the case of an oil well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to lack of a pipeline connection the flow period shall be three hours.			test. Tests : Northwest 1	8. The results of the above-described tests shall be filed in triplicate within 15 days after completion of the test. Tests shall be filed with the Aztec District Office of the New Mexico Oil Conservation Division on Northwest New Mexico Packer Leakage Test Form Revised 10-01-78 with all deadweight pressures indicated				
5 Following completion of Flow Te	st No. 1, the well shall again be shut-in,	in accordance with Decorrect 2		vell as the flowing temper	atures (gas zones only) and gravity and GOR (oil zones only).		
 Following completion of Flow Test above. 	station i, the wen shall again be shut-in,	in accordance with Paragraph 3
