If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Field technician arrived on location to start compressor and found dump on separator hung open and blowing to BGT. Dump valve was found to be out of adjustment. Operation specialist and technician corrected problem and are monitoring to ensure problem is fixed.

Describe Area Affected and Cleanup Action Taken.\*

Natural gas dissipated to atmosphere, so no clean-up action is possible.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
