13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On August 21, 2013, Huntington Energy filed a TA extension for the above referenced well. It was then realized that the pressure chart for the above referenced well had not been filed when the Temporary Abandonment procedure was performed on June 11, 2012. The well was tested at that time and tested OK, but the chart was not sent. A pressure test/chart was then performed in October, 2013, and the original chart was mailed to the BLM and NMOC.
