13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

D. J. Simmons, Inc. respectfully requests Continued Shut-In status for the subject well due to the following conditions:

The well has been shut-in since November 2011 due to low gas prices and high water disposal costs. The last production was near 65 mcf/d and 110 bwpd. Although gas prices have come up in previous months and the well is capable of production, economic production is still not viable. We request continued shut-in and "ready-to-run" status with annual approval pending economic improvement in order to recover the remaining reserves. The location and well are monitored and managed to conserve the investment, the resources in the reservoir and on the surface.
