Mr. Perrin:

Energen Resources finished a pay add and down hole commingling operations on the subject well, in accordance with the approved Notice of Intent.

Prior to commingling operations, the Blanco-Mesaverde was producing at a stabilized rate of about 100 MCFPD and less than ¼ BOPD. The Gavilan PC was added in May 2013. The well has stabilized at a rate of about 130 MCPD and about 3.5 BOPD. The following allocation is recommended (see attached production plot):

	<u>Gas</u>	<u>Oil</u>
Blanco-Mesaverde	77%	5%
Gavilan PC	23%	95%

If additional information is needed, please contact me at 505-325-6800.

Sincerely,

Adam Klem  
District Engineer
