| Was a Watercourse Reached?<br><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No  | If YES, Volume Impacting the Watercourse.<br>Unknown |   |

**OIL CONS. DIV DIST. 3**

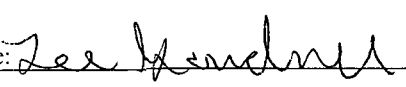

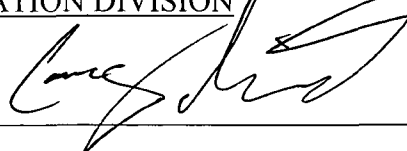

If a Watercourse was Impacted, Describe Fully.\*  
Oil from the ruptured flow line flowed into a wash and traveled downstream approximately 1800 feet.

**JUN 05 2014**

Describe Cause of Problem and Remedial Action Taken.\*  
It appears that an exposed flow line rubbed on the rocks over time and developed a hole. The flow line was shut down and repaired

Describe Area Affected and Cleanup Action Taken.\*  
Enviro-Tech Inc has been contracted to develop a remediation plan. The remediation plan will be presented to the Jicarilla Apache Nation for approval. The Jicarilla Apache Nation would prefer a bio-remediation process to address the spill. Due to the inaccessibility of the location, the usage of mechanical equipment for clean-up activities is not possible. The location is accessible only by foot.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
